Please note the underlined text in the electronic version of this update contains active links that provide additional information on the subject matter.

Summer is in session extending through September 7, 2013. Refer to the Calendar for more information. UC San Diego offers a choice of more than 600 UCSD courses and is open to not only UCSD students but also to visiting students! For more information, please visit the Enrollment and Registration page.

PROJECTS

Location of instructional and research facilities, as well as necessary campus support facilities, such as housing and parking, is directed by UCSD’s Long Range Development Plan (LRDP), which is prepared in response to campus enrollment and population projections. Available on the Physical and Community Planning website at http://physicalplanning.ucsd.edu/projects/index.html is the Capital Improvements Status Map which is an interactive map where each project link leads to a detailed project information sheet.

PROJECTS ANTICIPATED FOR COMPLETION LATER THIS YEAR (2013)

Central Research Services Facility — with anticipated completion in September 2013. This 40,500 GSF project provides support space for centralized cage wash operations, office and administrative support space for the Animal Care Program, Animal Welfare Program, Health Sciences staff and other campus research support units.

Theatre District Landscape — with anticipated completion in August 2013. The project includes landscape enhancements that would restore and renovate two acres of the Grove Reserve within the Theatre District.

University House — with anticipated completion in November 2013. This project focuses on the rehabilitation of the House which serves as both the Chancellor’s official residence and as an important venue for campus and community meetings and social events.

Venter Institute — with anticipated completion in November 2013. This 45,000 GSF, ground lease project is dedicated to the advancement of the science of genomics; the understanding of its implications for society; and the communication of those results to the scientific community, the public, and policymakers.

UC SAN DIEGO WINS SANDAG BIKE TO WORK CORPORATE CHALLENGE

The San Diego Association of Governments (SANDAG) recently announced the University of California, San Diego as a winner of the 2013 Bike to Work Corporate Challenge. The university was honored in the “Mega Employer” category, as part of the regional competition organized by iCommute, SANDAG’s Transportation Demand Management Program. The challenge was held during May 2013 to recognize National Bike Month.

“We are pleased to receive this countywide recognition,” said Robert Holden, director of Auxiliary Business Services, which oversees Transportation Services at UC San Diego. “UC San Diego is continually working to provide innovative commute solutions to help reduce the university’s carbon footprint.”

UC San Diego Transportation Services offers a wide range of commute solutions as alternatives to driving a vehicle to campus including free membership to the university’s Pedal Club, which encourages faculty, staff and students to travel to campus by bicycle. During the month of May, employees were encouraged to log their bicycle commutes to work. UC San Diego employees recorded the most trips in the “Mega Employer” category, consisting of companies with 5,000 or more employees.

According to SANDAG, overall more than 216,000 bicycle commute miles were logged as part of the challenge—equivalent to riding around the Earth nearly nine times. Approximately 9,400 gallons of gas were saved.

Earlier this year, UC San Diego also received the 2013 SANDAG iCommute Diamond Award in recognition of the university’s contributions to alleviating the region’s traffic congestion and greenhouse gases with alternative transportation options.
