PROJECT LOCATION
East Campus Neighborhood

PROJECT DESCRIPTION
This project provides approximately 330,000 gross square feet of new clinical research space including dry and wet laboratories, human subject research space, administrative support spaces and faculty physician offices for the Sulpizio Cardiovascular Center. The project also increases chilled water, high temperature hot water and emergency power capacity on the East Campus and extend utility distribution systems to serve the new building.

PROJECT PURPOSE
This new facility provides the space necessary to consolidate and expand the “bench to bedside” translational research on the East Campus. The project creates a multidisciplinary environment that brings together laboratory scientists and clinical investigators in order to foster translation of fundamental biological discoveries into new treatments and to enhance understanding of human disease.

PROJECT COST
$247.7 million

FUND SOURCE
Net new research funding by occupants of the building and UC San Diego School of Medicine funds.

COMPLETION DATE
Spring 2016

ARCHITECT
Zimmer Gunsul Frasca
