PROJECT LOCATION
Pepper Canyon Neighborhood

PROJECT DESCRIPTION
The project includes an expansion to the current Structural Materials & Engineering building. The expansion will be home to project-based teaching and learning facilities, including hands-on studios and ‘maker’ spaces.

PROJECT PURPOSE
The project will offer multidisciplinary research and design spaces for innovation and entrepreneurship. UC San Diego added a cross-divisional Design Minor in Fall 2015-16 and anticipates adding a Design Major. The project will be physically attached to the current Structural Materials & Engineering building but will differ in the programs offered. UC San Diego currently has limited space for non-traditional instructional space and this project addresses this issue with flexible and configurable work areas.

PROJECT COST
$50 million

FUND SOURCE
Campus funds, potentially state funds

CURRENT PHASE
Planning and Design

COMPLETION DATE
2020

ARCHITECT
HOK
