PROJECT LOCATION
South end of Marshall College in what is now surface parking lots P207 & P208.

PROJECT DESCRIPTION
The project will create a mixed-use area intended to foster interactions between students and faculty and staff, build community, and enhance vibrancy of place. The project will include undergraduate housing, lecture halls, offices, open space, dining, and service spaces. Increases in student enrollment and growth of academic programs require expanded facilities to house and provide educational opportunities and support space to match the growth increases.

PROJECT PURPOSE
The project purpose is to provide 2,000 undergraduate beds, resident facilities and residential life support space. The project will also provide instruction, administrative, and research space for departments and programs within the Division of Social Sciences and Arts and Humanities. The Campus Loop Road will be rerouted and redesigned with traffic calming in mind and will allow for Ridge Walk to be transformed into a more cohesive pedestrian area between north and south campus. A minimum of 1,200 parking spaces will replace the ~900 spaces removed from the current surface lots. Building heights will vary up to 14 stories to meet the housing goals and provide appropriate academic support and open space.

PROJECT COST
$490 million

FUND SOURCE

CURRENT PHASE
Planning Phase

COMPLETION DATE
Expected completion 2020-21

ARCHITECT
Safdie Rabines Architects
