PROJECT LOCATION
School of Medicine Neighborhood

PROJECT DESCRIPTION
The Osler Lane surface lot would host approximately 120 parking spaces on a land parcel that is currently turf. This area is programmed for a future Health Sciences building expansion and would be available to temporary parking use until that building is constructed. Because the area is situated at the Gilman Entrance to campus, a bermed landscape feature will help screen the southwest corner of the lot.

PROJECT PURPOSE
This short-term temporary parking lot is being provided due to the increase in parking demand across the campus. The short-term solutions would help bridge the parking supply until the Mid-Coast Corridor Light Rail Transit is complete, at which time the campus can evaluate the Trolley's impact on parking demand.

PROJECT COST
$1.5 million

FUND SOURCE
Campus funds

CURRENT PHASE
Construction Phase

COMPLETION DATE
July 2016

Note: Capital projects develop over time, therefore the information on this project sheet is likely to change over time. For the latest information and data please contact Community Planning at commplan@ucsd.edu
