RIMAC STAGE

PROJECT LOCATION
North Campus Neighborhood

PROJECT DESCRIPTION
The proposed project is located adjacent to the RIMAC facility and provides a safer, more grounded and tailored design than a temporary structure. The amount of field permanently impacted would be minimal, and activity disruption would last up to 1 day before and after events. The accessibility and availability of a permanent stage is much warranted given the student population who are the prime constituents.

The stage would be used during performances, concerts, and ceremonies, including commencement and convocation ceremonies that take place on the UC San Diego campus at RIMAC Field.

PROJECT PURPOSE
Currently these events are accommodated by renting a stage for each individual event. A permanent stage would have a quick return on investment as material and labor costs associated with each stage rental are not cost-effective. Additionally, the temporary stage interferes with the athletic program on the playing field, disrupting athletic activities for several days during the construction, use, and disassembly of the stage.

PROJECT COST
$2.5 million

FUND SOURCE
Campus and donor funds

CURRENT PHASE
Design Development Phase

COMPLETION DATE
Fall 2016

ARCHITECT
GMH Associates
