PROJECT LOCATION
La Jolla Farms Neighborhood

PROJECT DESCRIPTION
This project will rehabilitate the existing University House to correct facility and code deficiencies so that it may once again serve as both the Chancellor’s residence and the public venue for a variety of University functions. The project will include stabilization of the soil on the south side (bluff side) of the site and seismic stabilization of the roof structure.

PROJECT PURPOSE
The project will preserve the historical and cultural character of the property. The University House is recognized as a Pueblo Revival style adobe structure and is listed on the California Register of Historical Resources and the National Register of Historic Places. In 2008, the site was classified as a sanctified cemetery by the California Native American Heritage Commission. The project site is adjacent to a sensitive coastal bluff and special consideration will be given to associated environmental issues.

PROJECT COST
10.5 million

FUND SOURCE
Gift funds

CURRENT PHASE
Project completed in December 2013

ARCHITECT
IS Architecture
